

Mazus reptans 'Violet'

An excellent cold tolerant ground cover, from the Himalayas. It stays tight with vivid green leaves, the lavender violet flowers are produced all year. It's great in-between steppingstones. Sun or partial shade, good soil with regular water. It can be divided to increase quantities. A white form is also available.

Origanum 'Betty Rollins'**Dwarf Oreganos**

Very low growing cultivar of the culinary herb, selected in Los Angeles. It makes a beautiful mat of foliage, very nice between stepping stones adding a nice fragrance, with an added bonus of large pink flower clusters in the summer. It can be divided in the spring, full sun with regular water provide the best growing conditions, although it will tolerate part shade.

Thymus drucei 'Minus'**Dwarf Trailing Thyme**

Very compact, an almost moss-like thyme, easier to grow than most. Needs full sun and good drainage. Small pink flowers are produced in the summer.
